

# 404 - The Lost Coin Whitepaper

*“Because not all errors are mistakes.”*

---

## Introduction

**404Coin** is a meme-powered cryptocurrency inspired by the iconic “404 Not Found” error — a symbol of digital chaos, lost systems, and misunderstood genius.

Born not from corporate hype but from the absurdity of error, 404Coin stands as a rebellion against scams, rug pulls, and centralized fraud.

It's fun, transparent, and designed with the community at heart.

## Vision and Mission

**Vision:** To be the most trusted and iconic meme token in Web3, where humor meets transparency and digital rebellion becomes value.

**Mission:** Empower decentralized communities through meme culture, gamified rewards, and ethical tokenomics — while never taking ourselves too seriously.

All LP tokens will be locked for 12 months using services like **Pinksale** or **Unicrypt**.

## Final Note

*“When the page fails to load, the fun begins.”*

404Coin is not just another meme token.

It’s a movement born from internet chaos — where even failure has value.

With over 40% transparently locked or vested and strong DAO participation, 404 is here to **redefine what “error” truly means.**
